MICROPHONE	
Frequency	50 Hz – 10 KHz
Sensitivity	-42 dB ± 3 dB
Impedance	< 2,2 K Ohm
OTHER	
Cable length	130 cm
Weight	20 g

II. USING THE EARPHONES

Volume controller

Adjust the output volume by moving the slider on the controller. This control is independent from the device's volume settings. Unlike regular + / - buttons, this system ensures its compatibility with all types of phones, tablets and computers.

Warning: Using earphones at a high volume (greater than 85 dB) for extended periods of time may cause permanent harm.

Magnetized heads

Both metal earphones feature magnets. Wrap them around your neck safely or put them together to avoid any cable entanglements.

Equalization and first time use

Our ears are used to familiar sounds and frequencies, such as the ones from other headphones we may have used in the past. When trying the KLIM Fusion earphones for the first time, please allow at least 10-15 minutes for your ears to adapt.

Also, remember that you may customize your audio experience by using third-party equalization apps, which are usually available on PC and Android.

Multi-function button - Playback & phone controls

Play / Pause	Press once to play or pause the current track or song
Skip track	Press twice in quick succession to skip to the next track or song
Previous track	Press three times in quick succession to go back to the previous track or song
Pick up call Mute microphone	Press once to pick up an incoming call or mute the microphone during a call
End call	Press for a few seconds during a call
Google assistant	Press for a few seconds to bring up the assistant

Note: playback controls and microphone/call compatibility may vary depending on your device.

III. PRODUCT MAINTENANCE

We recommend handling this product with care and avoid any impacts or cable pulls. While in your pocket or bag, be careful with the product: avoid putting too much weight on it, and keep the cable as straight as possible, especially near the connector, volume control unit and earphones.

Memory foam ear tips

KLIM Fusion earphones use special memory foam ear tips. They automatically expand in your ear for maximum external isolation, comfort and sound quality.

To clean them, use a slightly damp cloth, paper towel or thin ear cue-tip to gently remove any excess dirt, then dry it out. Be careful not to let them soak too much water since they could become hard and lose some of their properties. Lastly, do not scrape too hard since you may damage the foam.

We also recommend replacing the memory foam ear tips periodically once they are too worn, so that your audio experience is always optimal. Boxes of memory foam ear tip replacements are available on our store at <https://store.klimtechs.com>.

IV. TROUBLESHOOTING & CONTACT

If you ever encounter any problems, remember that we remain at your disposal to help you with any issues. Do not hesitate to contact us at support@klimtechnologies.com for additional support.

There is no sound coming off the earphones / the volume is very low

Make sure that the connector is properly plugged into your device. Check that the volume slider is at an adequate position (it may sometimes be inadvertently moved, reducing or muting the sound) and verify the sound settings on your device.

The next/previous command does not work or it modifies the volume instead

Devices connected via USB-C devices may interact differently depending on the phone model, affecting how the phone interprets the multi-function button presses. Some models have headset customization options, please refer to your mobile device's manual for more accurate instructions, or contact us to receive further assistance.

There is a rustling sound when I speak during the calls

Avoid using the microphone in windy areas and check that the microphone is not rubbing against your clothes. Use the lapel clip to better position the cable and microphone and avoid any unwanted contact with your clothing.

We thank you again for your purchase and hope that you enjoy using our KLIM Fusion C earphones. Do not hesitate to leave a comment on the site you purchased it, it will help us tremendously :)
